

IS YOUR PAYROLL IN the Cloud?

Ah, the cloud. No, not the fluffy white one - we're speaking of the **VIRTUAL CLOUD** we've all come to know.

With anywhere, anytime secure access to employee data,

along with unlimited storage solutions, many companies have gone ...

PAPERLESS!

Although the benefits of **being green** might not be immediately visible, **paperless payroll processing** can affect a bottom line—

reduced paper, mailing, printing costs, etc. A large employer can easily save thousands in a year by implementing paperless payroll.

DIRECT DEPOSIT OR PAY CARDS

are **safer** and **cheaper** than getting paid by paper check.

A paperless payday provides employees with several benefits:

Instant access to their full wages on payday, even when they're away from work

Eliminate expensive check cashing services

No longer have to worry about lost or stolen checks

No time wasted standing in line to receive or cash their paycheck

Funds are immediately available on the pay date

Paystubs are available online 24/7

Fewer payroll mistakes

Along with the decision of going paperless, you must determine the **frequency**, normally controlled by state regulations.

To view our chart on payroll frequency benefits and considerations, click [HERE](#)

Whatever frequency you choose, utilizing a **cloud based payroll system** allows you to submit your payroll data according to your schedule.

Going paperless benefits:

EMPLOYERS

EMPLOYEES

ENVIRONMENT

Paperless payroll is not just **something in the future**, it's how today's businesses should be operating **now!**
